Palo Alto, CA

EXPERIENCE

NYU High Speed Research Network

C++ Software Engineer (Paid)

- Engineering a high-throughput low-latency network client to power groundbreaking research in areas including AI, applied physics, computational chemistry, AR/VR, and audio engineering.

September 2023 – Present

New York, NY

Forbes Media

Technology Operations Intern (Paid)

- Primary deployment and frontend engineer for dynamic webpage to drive **\$2.6M revenue** (est.). Built Argo pipeline, configured GCP hosting and Varnish routing logic. Built page with React and SASS for mobile & desktop. Collaborated with product design team and wrote TRD praised by senior engineers.
- Optimized platforms for revenue-driving AI and CMS supporting **~2 billion** website requests per month.
- Key contributor to full stack development of Next.js DevOps portal. Discovered critical security vulnerabilities.
- Migrated 18 deployment pipelines to Argo. Improved in-house Kubernetes Argo Slack trigger in Go.

June 2023 – August 2023

New York, NY

Payoneer

Backend Software Engineer Intern (Paid)

- Built microservice for payment status notifications in .NET, C#, & MSSQL with load balancing techniques and asynchronous request queue to replace synchronous SQL proc calls and **speed up dozens of APIs by ~736%**.
- Monitored APIs in production to fix errors, find bottlenecks, and load test with Dynatrace, Coralogix, & k6.
- Discovered microservice bug leading to recovery of \$4,100 in past lost fees + projected \$2,000/year fees recovered.

June 2022 – September 2022

New York, NY

Lightning Tech

Founder of Technology Consultation Business

- Earned **\$30,000+** profit serving **8 businesses** and **200+ customers** with IT consulting & web design & SEO.

September 2017 – August 2023

Marin, CA

PROJECTS

Research for NYU Martin Luther King, Jr. Program | NumPy, Playwright, Python, Typescript

- Awarded \$7,500 grant for proposing to research student bias against diverse NYU professors.
- Developed multithreaded web scraper w/ built-in process manager in Node.js & Playwright to scrape 5 years of university-wide course evaluation data for **772,542** instructor evaluations.
- Conducted statistical analyses and graphed data with Numpy and Matplotlib **identifying significant evidence of discrimination** against professors of color at NYU. Crafted literature review and findings analysis.

Fitme | Swift, Node.js, Firebase

- Fashion social media & ecommerce iOS application (as seen on website)
- Wrote **11,171** lines of Swift for iOS application and designed user interface applying UI/UX principles.
- Designed architecture for and programmed backend: algorithm, direct messages, media storage, authentication.
